**Flag:** Follow up

Hi Brent

Couple of questions/suggestions: What about the warehouse owner? Are they being put on notice?

Suggest adding a compliance schedule... I assume this will happen after they receive it.

Approval of destination facilities and copies of manifests.

As for R3 – they are writing a new CD, the current violations will be addressed through stipulated penalties.

Hi Larry,

We just finished up our internal call. Hill Davis, with the NC Attorney General's Office, is going to reach out to Joyce Howell, with EPA Region III, but it will be next week before that will happen. Hill wants to confirm our interpretation of the Consent Decree, in that the lead chloride going to any other facility besides "Equidae" should have been sent on a hazardous waste manifest (not protective), and managed as, at a minimum, a D006/D008 hazardous waste.

There were no questions related to the content of our IANOV. The entire discussion revolved around if we want to fight the K061 battle now, and how confident we are that it could not have been shipped/stored at the Mayse Warehouses per the 1995 Consent Decree.

All the call participants are expecting EPA Region III to push AZP from the other side in enforcing the requirements spelled out in the Consent Decree. I suspect that will be part of the discussion between Hill and Joyce.

Anyway, it will be next week before any movement occurs, and I will update you on any decisions made as soon as possible.

Thanks again for all the help you, Alan, Laurie, and Paula provide on these situations.

Enjoy your 4<sup>th</sup>...Brent
